Skills

Languages & Technologies:

- HTML5, CSS3, SASS/SCSS
- Redux
- JavaScript (ES6+),
- TypeScript,
- React.js,
- MongoDB, SQL
- Node.js, Express.js,

Frameworks & Libraries:

- React,
- Bootstrap,
- Angular,

Development Practices:

- RESTful APIs,
- Responsive Design,

Version Control & Deployment:

- Git, GitHub,
- Heroku, Netlify, AWS
- Docker
- Google Cloud Platform

Soft Skills:

- Problem Solving,
- Analytical Thinking,
- Technical Communication
- Team Collaboration
- Time Management

Development Practices:

- Agile Methodologies (Scrum, Kanban)
- Test-Driven Development (TDD)
- CI/CD (Continuous Integration/Deployment)
- Cross-Browser Compatibility
- Web Accessibility (WCAG)
- Performance Optimization

German (Basics)

About Me

Full Stack Web Developer specializing in the MERN stack (MongoDB, Express, React, Node.js). Skilled in API integration, responsive design, and cloud deployment using AWS and Heroku.

Committed to delivering clean, efficient, and user-centered applications through creative problem-solving and analytical thinking.

Dedicated to continuous learning and innovation in web technologies.

Education

2025 | Full Stack web Development | CareerFoundry

- Comprehensive, project-based training covering both front-end and back-end development.

- Courses: React Development, REST APIs, Testing, AWS Deployment

2025 | Google IT Support Professional Certificate

- Foundational IT certification focused on real-world technical support and troubleshooting.

- Computer Networking, System Administration, IT Security, Operating Systems, Customer Support, and Incident Management.

2004 Meknes University of Law & Economy | 2 years

2006 | German language studies | 2 years

Experience

One Stop: Store Manager

2014 - 2017

- Supervised daily store operations to ensure smooth workflow
- Oversaw inventory control, ordering
- Handled cash flow, sales reports, and financial documentation

UPMC Hospital: Floor & project technician

2016 - Present

- Maintain safety and cleanliness in healthcare environment.
- Support large-scale projects and cross-department collaboration.
- Recognized for reliability, adaptability, and consistent results.

University of Pittsburgh- Support Technician

2018 - 2023

- University of Pittsburgh — Support Technician
- Assisted with operational support projects.
- Contributed to safe, efficient facilities.
- Built transferable skills in teamwork, project support, and problem-solving.

Projects

MyFlix React

A MERN stack application featuring a React frontend for movie browsing, user profiles, and favorites management.

Backend built with Node.js, Express, and MongoDB showcasing RESTful API integration.

MyFlix Angular

A dynamic movie app built with Angular and Node.js backend.

Features user authentication, movie browsing, profile management, and favorite movie saving.

Pokedex App

An interactive Pokémon catalog built with JavaScript and Bootstrap.

Demonstrates clean API integration, responsive design, and search/filter functionality.

Meet App

A Progressive Web App (PWA) built with React and serverless architecture (AWS Lambda). Includes real-time event search, location filtering, calendar integration, and offline functionality.

Chatify App

A React Native chat app using Expo and Firebase.

Supports real-time messaging, image sharing, location features, and offline sync.

Movie API

A RESTful API built with Node.js, Express, and MongoDB for movie data, authentication, and favorites.

Powers the MyFlix apps with dynamic data handling.
